IMPORTANT NOTIFICATION

International application No. PCT/US2005/003299

International filing date (day/month/year) 03.02.2005

Priority date (day/month/year)

04.02.2004

Applicant

MCKESSON AUTOMATION SYSTEMS, INC.

- The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary report on patentability and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- Reference is made to the following document:
 D1: US-A-5 771 657 (LASHER ET AL) 30 June 1998 (1998-06-30)
- 2. Although claims 1, 7 and 9 have been drafted as separate independent method claims, they appear to relate effectively to the same subject-matter and to differ from each other only with regard to the definition of the subject-matter for which protection is sought and/or in respect of the terminology used for the features of that subject-matter. The aforementioned claims therefore lack conciseness and as such do not meet the requirements of Article 6 PCT.
- 3. Although the claims specify commonplace technical features, no technical problem which might require an inventive step to overcome can be established. The problems (see description Par. 2-4) which are apparently addressed do not appear to require a technical, but rather an administrative/organisational, i.e. business solution. The implementation of this solution may include the use of generic technical features, however these do not interact to solve any overall technical problem but merely serve their well known functions. Therefore the subject-matter of claims 1-9 does not involve an inventive step in the sense of Article 33(3) PCT.
- 4. The document D1 discloses:

A method of discriminating between orders, comprising:
evaluating a queue of orders based on whether each prescription within the
order can be filled in an automated manner, and
determining a set of workstations for each prescription based on said evaluating
(see Col.3, lines 32-59).

Therefore the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.

It should be noted that the method of claim 1 could be executed by a person. The automation of this method by a (computerised) system would be implemented without

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/US2005/003299

inventive skill (Article 33(3) PCT).

- 5. Dependent claims 2-6 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and/or inventive step, the reasons being as follows:

 The features of claims 2-6 relate to well known features in automated prescription filling systems (e.g. document D1). Therefore the subject-matter of claims 2-6 is not new in the sense of Article 33(2) PCT and/or does not involve an inventive step in the sense of Article 33(3) PCT.
- 6. The same reasoning applies, mutatis mutandis, to the subject-matter of claims 7-9, which therefore are also considered not new (Article 33(2) PCT) and/or inventive (Article 33(2) PCT).
